

Structured Hiring Rollout Checklist

A 30/60/90 plan for moving an organization from ad-hoc interviews to consistent, evidence-based hiring.

Days 1–30 — Foundation

- ☐ Pick one high-volume role family as the pilot
- ☐ Define 4–6 competencies with observable definitions (Competency Matrix)
- ☐ Write the question set and scoring anchors (Question Bank + Rubric)
- ☐ Pilot the interview on 2–3 current strong performers; rewrite what doesn't differentiate
- ☐ Brief interviewers: independent scoring, evidence notes, behavioral language

Days 31–60 — Pilot

- ☐ Run all pilot-role interviews on the structured process
- ☐ Enforce scorecard-before-debrief on every panel
- ☐ Review score distributions weekly: anchors too soft? interviewer outliers?
- ☐ Collect candidate feedback on the experience

Days 61–90 — Scale

- ☐ Fix what the pilot exposed (questions that didn't differentiate, ambiguous anchors)
- ☐ Extend to the next 2–3 role families, reusing the template
- ☐ Stand up adverse-impact monitoring: pass rates by stage, by group
- ☐ Set the quarterly loop: compare interview scores to on-the-job performance and refine

What makes rollouts fail

- Mandating structure without making it the EASY path (pre-built questions, rubrics, tooling)
- Letting senior interviewers opt out — inconsistency at the top licenses it everywhere
- Skipping the outcome loop — without validation, the process never improves and support erodes
